

PHOTOGRAPHY/FILM - THE BASICS:

The object of this eight week course is to learn how to use a Digital Single Lens Reflex camera (DSLR). Students will discover how cameras work and learn about the history of photography in its various forms since 1860. Scenes from 20th and 21st century cinema will be shown to highlight various photographic techniques. We will study the importance of exposure, shutter speeds and film grain by a variety of media. The course will demonstrate how to take photos under different lighting conditions, even in semi-darkness. The class will identify common mistakes in photography and how to correct them. We will explore how reflections in a human eye heighten a beautiful portrait and how to achieve a 'perfect' photograph. At the end of the course there will be a class/school presentation of the students' finest work.

PHILOSOPHY - AN INTRODUCTION

Literally translated as being a love of knowledge/wisdom; philosophy aspires to answer the fundamental questions in life and get to the very root of human existence in order to develop a greater understanding of our place in the world and our relationships with one another. Do we know there is a God? What is the ultimate nature of the universe? What constitutes a right and wrong action? We will also look at the historical development of philosophy from the Ancient Greeks to the moderns.

PUBLIC SPEAKING

Become more confident with public speaking. Make a wedding speech, deliver that sales pitch or simply be yourself in any group at any time. Participants will engage in fun, short speaking exercises every week and craft and deliver unique and engaging speeches.

CREATIVE WRITING

Have you decided this is the year you'll see your name in print, on the cover of a novel or in the form of a memoir, short story or essay? Tutor Ross Campbell is offering creative writing classes that will help you put a shape to your story and give you the building blocks to fulfil your dreams. Classes are relaxed and informal. Writers will receive helpful feedback on their writing from the class. Tips too on how to get your writing published. Short assignments will be given out to do each week.

DIGITAL PHOTOGRAPHY

This course will cover all aspects of digital photography including camera equipment, taking a picture, post processing and printing.
